	Offshore Domiciled (USD-Based)	South African Domiciled (ZAR-Based)
Fund Name	RECM Global Fund	Prescient RECM Global Feeder Fund*
Strategy	Flexible Balanced	Flexible Balanced
Investor Category	Retail/Institutional	Retail/Institutional
Value Proposition	A US dollar denominated global fund that may invest in a wide array of assets without any restrictions. The Fund's aim is to generate returns significantly greater than US inflation and commensurate with equities over the long term. The fund invests mainly in large global companies at a significant discount to intrinsic value, while using the flexibility of the mandate to protect capital and enhance returns by investing in other mispriced global assets from time to time.	A rand denominated fund that provides local investors with access to the RECM Global Fund.
Investment Universe	Global listed securities across all asset classes	As per RECM Global Fund
Benchmark	US CPI + 6% p.a.	As per RECM Global Fund
Hurdle	US CPI + 8% p.a.	As per RECM Global Fund
Base fee excl. VAT	1.00%	0.25% plus Global Fund Fee
Performance fee excl. VAT	20% above hurdle, subject to positive performance accrual over a rolling 5 years.	N/A

No warranty is given as to the accuracy or completeness of the information and no liability is accepted for reliance upon the information.

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or investments may go down as well as up and fluctuations or movements in exchange rates may also cause the value of underlying international investments to go up or down. Past performance is not necessarily a guide to the future. The manager does not provide any guarantees either with respect to a funds' capital or investment returns. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. The quantifiable deduction is the annual management fee (and performance fee where applicable), whilst non-quantifiable fees included in the net asset value price may comprise brokerage, auditor's fees, bank charges, taxes, trustee and custodian fees. Collective investment prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Forward pricing is used. Where a fund is exposed to foreign securities, investors should consider the (a) potential constraints on liquidity and repatriations of funds, (b) global macro-economic risks, (c) political risks, (d) foreign exchange risks, (e) tax risks, (f) settlement risks and (g) potential limitations on the availability of market information. Funds may be closed. Prior to investing in a fund, please read the Minimum Disclosure Document for your chosen fund/s available at www.recm.co.za.

The RECM Money Market Fund is not a bank deposit account. The price of each unit in the Fund is targeted at a constant value. Investors' total returns are made up of interest received and any gain or loss made on any particular instrument; and that in most cases the return will merely have the effect of increasing or decreasing the daily yield, but in cases of abnormal losses it can have the effect of reducing the capital value of the Fund. The Fund's yield quoted on an annual effective rate (NACA) basis. The NACA is the effective interest rate an investor can expect to earn over a 12 month period based on the nominal yield of the fund at a point in time. The nominal yield is simply the net interest accrual of all the instruments in the fund divided by the number of units in the fund (the fund NAV). The quoted NACA is always higher than the nominal yield because the calculation is based on an investor re-investing the monthly income distribution back into the fund at the nominal yield. (i.e. The NACA is the compounded annual 12-month rate). Excessive withdrawals from the Fund may place the Fund under liquidity pressures; and in such circumstances a process of ring fencing of withdrawal instructions and managed pay-outs over time may be followed.

The Prescient RECM Global Feeder Fund invests in the RECM Global Fund, which levies its own charges (**and which could result in a higher fee structure for the feeder fund.**)
