**Disclosures:** Collective Investment Schemes in Securities (CIS) should be considered as medium-to long-term investments. The Manager does not provide any guarantee either with respect to the capital or the return of the Fund. The value of participatory interests (units) may go up as well as down and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of any underlying international investments to go up and down. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (Brokerage, STT, VAT, Auditor's fees, Bank Charges, Trustee and Custodian fees and the annual Management fee) from the portfolio divided by the number of participatory interests (units) in issue. A schedule of fees, charges and maximum commissions is available on request from the management company. Commission and incentives may be paid and if so, would be included in the overall costs. These portfolios may be closed. Different classes of units may apply in a portfolio and are subject to different fees and charges.

## \*Total Expense Ratio (TER) and Transaction Costs

The TER reflects the percentage of this Fund's Net Asset Value that was incurred as expenses relating to the administration of this Fund, including the annual fee and the performance fee and intermediary fee if applicable. A Higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction costs are a necessary cost in administering this Fund and impacts this Fund's returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. The TER and Transaction costs are a measure of the actual expenses incurred by this Fund over a 3 year period (annualised). If this Fund is between 1 and 3 years old, the TER and Transaction Costs are calculated using the actual expenses incurred since the inception of this Fund. The sum of the TER and Transactions Costs is shown as the Total Investment Charge overleaf; these costs all being VAT inclusive.

Returns are in ZAR, on a lump sum investment, NAV-NAV, net of fees with net distributions reinvested. Annualised returns are the weighted average compound growth rate earned each year over the given time period. Individual Investor's performances may differ due to fees, actual investment date, dates of reinvestments and dividend withholding taxes.
