

RECM GLOBAL FLEXIBLE FUND (Class C)

Period ended 31 October 2014

RECM

The RECM Global Flexible Fund is a unit trust that may invest in equities, bonds, property, cash and offshore assets without any restrictions. The Fund's aim is to generate returns significantly greater than inflation over the long term while protecting capital against permanent loss through a rigorous adherence to a value-based philosophy. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund.

Portfolio Managers	Daniel Malan, Wilhelm Hertzog, Paul Whitburn

INVESTMENT COMMENT

The top ten holdings make up 33.2% of the Fund. This reflects the polarity in the market. Many shares are trading at expensive levels, but a pocket of the market is offering extraordinary value - largely concentrated in cyclical businesses such as resource companies.

Our portfolios don't have indiscriminate exposure to resources however. We have specifically selected certain stocks in resources such as platinum where the commodity price is at cyclical lows, and have avoided others such as iron ore which are still coming off their peaks (hence our lack of exposure to BHP Billiton). Importantly, our investment thesis does not rely on peak earnings, prices, margins, or forecasts but rather on what earnings should be when things return somewhat closer to "normal". Whilst one can debate the impact of recycling, substitution effects or structural changes in an industry such as platinum, it is a fact that global demand is officially outstripping global supply including recycling. As long as that is the case, there will ultimately be upward pressure on the platinum price when inventories above the ground are worked through. This year, the production shortage of platinum will be between 1m and 1.5m ounces.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RECM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertificated securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. RECM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000.

RECM GLOBAL FEEDER FUND (Class C)

Period ended 31 October 2014

RECM

The RECM Global Feeder Fund is a Rand denominated fund that provides local investors with access to the RECM Global Fund. The RECM Global Fund is a US dollar denominated global fund that may invest in a wide array of assets without any restrictions. The Fund's aim is to generate returns significantly greater than US inflation and commensurate with equities over the long term. The fund invests mainly in large global companies at a significant discount to intrinsic value, while using the flexibility of the mandate to protect capital and enhance returns by investing in other mispriced global assets from time to time. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund.

INVESTMENT COMMENT

The Fund has recently increased exposure to UK retailers Tesco and Wm Morrison. These businesses are going through difficult times in a tough competitive environment with the share prices reflecting the market's extrapolation of those difficulties in perpetuity. With the UK consumer under pressure, hard discounters such as Aldi and Lidl have increased market share at the expense of the incumbents. Tesco's share price collapsed further in September when they announced that they had recently overstated their profits by £269m in a profit update to the market. We saw the steep declines in share price as an opportunity to increase exposure to the UK's largest food retailer at even better valuations. Even after taking into account growth rates far lower than historic rates for both businesses, our estimates of intrinsic values are significantly higher than current prices. Our investment thesis is predicated on improved trading densities and profit margins. We believe the recent share price declines to be temporary, and used them as an opportunity to build these positions further.

Disclaimer: Collective Investment Schemes in Securities (CIS) should be considered as medium-to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS are traded at the ruling price and can engage scrip lending and borrowing up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from Prescient Management Company Ltd. Commission and incentives may be paid and if so, would be included in the overall costs. Different classes of units may apply in a portfolio and are subject to different fees and charges. A fund of funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. A Feeder Fund is a portfolio that, apart from assets in liquid form, consists solely of participatory interests in a single portfolio of a collective investment scheme. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of any underlying international investments to go up and down. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (Brokerage, STI, VAT, Auditor's fees, Bank Charges, Trustee and Custodian fees and the annual Management fee) from the portfolio divided by the number of participatory interests (units) in issue. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period TER's do not include information gathered over a full year.

RECM GLOBAL EQUITY FEEDER FUND (Class C)

Period ended 31 October 2014

RECM

The RECM Global Equity Feeder Fund is a Rand denominated fund that provides local investors with access to the RECM Global Equity Fund. The RECM Global Equity Fund is a US dollar denominated offshore fund which invests exclusively in Global Equities. It aims to generate better returns than the MSCI World All Countries TR Index over the long term by selecting shares based on a value philosophy. Investors in this fund would seek long term outperformance of the passive alternatives which are derived from our stock picking skills, rather than protection against short term market volatility. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety.

RECM GLOBAL FUND (Class B)

Period ended 31 October 2014

RECM

The RECM Global Fund is a US dollar denominated global fund that may invest in a wide array of assets without any restrictions. The Fund's aim is to generate returns significantly greater than US inflation and commensurate with equities over the long term. The Fund invests mainly in large global companies at a significant discount to intrinsic value, while using the flexibility of the mandate to protect capital and enhance returns by investing in other mispriced global assets from time to time. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund. The Offering Memorandum is available at www.recm.co.za.

INVESTMENT COMMENT

The Fund holds a significant position in energy company BP. The market is placing a discount on BP due to company specific issues. Finding new barrels of oil has become increasingly expensive and Return on Capital (ROC) has been under pressure recently. The company's exposure to Russia via their 19.8% stake in Rosneft (the country's largest oil producer), as well as the extent of claims arising from the Deepwater Horizon oil spill, still continue to weigh on the price. A federal judge in New Orleans recently ruled that BP's "gross negligence" and "wilful misconduct" had caused the massive oil spill in the Gulf of Mexico in 2010. The stock is priced so low that even factoring in the worst case scenario of \$17bn in additional damages, or a write-off of their stake in Rosneft, it still trades at a discount to our estimate of fair value. Recently reserve replacement has been high; production is expected to grow next year while dividends are returning to normal. BP is a high quality business which is trading at a compelling price to earnings ratio of 6. As such, we retain a position in the stock, while enjoying a dividend yield of around 4.9%.

Disclaimer: Collective Investment Schemes in Securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Collective investments are traded at ruling prices. The manager may borrow up to 10% of the net asset value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available from the company/ scheme. Commission and incentives may be paid and if so, would be included in the overall costs. The quantifiable deduction is the annual management fee (and performance fee if applicable), whilst non-quantifiable fees included in the net asset value price may comprise brokerage, auditor's fees, bank charges, trustee and custodian fees. Collective investment prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Forward pricing is used. The Management Company is RECM Global Management Limited. The Custodian is Royal Bank of Canada (Channel Islands) Limited and the Administrators are Kleinwort Benson (Channel Islands) Fund Services Limited. The Fund's annualised Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. This fact sheet should be read in conjunction with the "Schedule of Similarities and Differences" available on the website. RECM Collective Investments (Pty) Ltd is a member of the Association for Savings and Investment SA (ASISA).

RECM GLOBAL EQUITY FUND (Class B)

Period ended 31 October 2014

RECM

The RECM Global Equity Fund is a US dollar denominated offshore fund which invests exclusively in Global Equities. It aims to generate better returns than the MSCI World All Countries TR Index over the long term by selecting shares based on a value philosophy. Investors in this fund would seek long term outperformance of the passive alternatives which are derived from our stock picking skills, rather than protection against short term market volatility. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety.

INVESTMENT COMMENT

The Fund has recently increased exposure to UK retailers Tesco and WM Morrison. These businesses are going through difficult times in a tough competitive environment with the share prices reflecting the market's extrapolation of those difficulties in perpetuity. With the UK consumer under pressure, hard discounters such as Aldi and Lidl have increased market share at the expense of the incumbents. Tesco's share price collapsed further in September when they announced that they had recently overstated their profits by £269m in a profit update to the market. We saw the steep declines in share price as an opportunity to increase exposure to the UK's largest food retailer at even better valuations. Even after taking into account growth rates far lower than historic rates for both businesses, our estimates of intrinsic values are significantly higher than current prices. Our investment thesis is predicated on improved trading densities and profit margins. We believe the recent share price declines to be temporary, and used them as an opportunity to build these positions further.
