

RECM EQUITY FUND (Class B)

Period ended 31 July 2014

RECM

The RECM Equity Fund is a unit trust which invests exclusively in South African equities. The Fund's aim is to outperform the South African equity market over the long term by selecting shares based on a value philosophy. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety.

INVESTMENT COMMENT

The largest purchases in recent months include Aveng Construction and Glencore. Aveng is one of the largest construction firms in South Africa with a large steel distribution/manufacturing division, a contract mining division and an Australian construction division. The local construction component of the business is relatively small compared to the other divisions and long-term profitability hinges on the local steel business and its Australasian construction business. Glencore is the fourth largest diversified miner globally after its 'merger' with Xstrata. The business is slightly different to the other large diversified miners in that it is vertically integrated with a substantial trading operation that brings strong end-user relationships. As an added benefit, the business has large exposures to materials that we believe are trading below their incentivisation prices – namely thermal coal, copper and zinc. Glencore's exposure to iron ore is not insignificant and was considered a problem when the iron ore price was trading at \$145 a ton. This price is now at \$95 with many new entrants impairing exploration assets and exiting the industry. We also believe that the management teams in Glencore are good capital allocators and they may very well be able to increase their iron ore exposure at the bottom of the cycle. The management team owns a substantial portion of the business, which should incentivise them to make the correct decisions. Notable sales in the Fund recently include Anglo American and Grand Parade Investments. Anglo American is still the Fund's second largest holding, but after a rerating during the period we decided to sell a small portion of our holding as the discount to fair value had narrowed.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RECM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Funds are valued daily at 15h00. Instructions must reach RECM before 14h00 to ensure same day value. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertificated securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RECM Collective Investments (Pty) Ltd. Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. The RECM Equity Fund Class B has a Total Expense Ratio of 0.91%. For the period from 1 July 2013 to 30 June 2014, 0.91% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER can not be regarded as an indication of future TER's. Inclusive of the TER of 0.91%, a performance fee of 0.0% of the Net Asset Value of the class of participatory interest in the portfolio was recovered.
