About the Fund

The RE:CM Global Flexible Fund is a rand denominated worldwide balanced fund that may invest in equities, bonds, property, cash and offshore assets. Funds are shifted between various asset classes to take advantage of areas of value.

Fund Objective

The primary objective of the portfolio is to generate returns greater than inflation over the long term with lower than average risk for investors.

Risk Measures

We look at risk in terms of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund.

INVESTMENT COMMENT

The RE:CM Global Flexible Fund owns shares in Implats, Amplats and Anglo American. These are companies that have significant operations in SA and while most of their costs are also in SA Rands, these are in fact global businesses with revenues priced in US Dollars and affected by outcomes in global economies. We own these in the fund because we are increasingly interested in cheap global cyclical stocks, because that is where markets are offering the best prospective investment returns. However, while Anglo American is very cheap at present, BHP Billiton is priced at fair value. Furthermore, the commodity mix in these two businesses is very different. Anglo American has significant exposure to platinum, which is hated, and BHP doesn't have any exposure to platinum. And we are impressed with Mr Cutifani's public statements to date. Time will tell, but it appears as if Anglo American may be going back to its roots in terms of being a counter-cyclical capital allocator in the global commodity markets. This could mark an important turning point for the company and its long term shareholders.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where sufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RE:CM Collective Investments (Pty) Ltd (RE:CM). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Funds are valued daily at 15h00. Instructions must reach RE:CM before 14h00 to ensure same day value. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertificated securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RE:CM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. The RE:CM Global Flexible Fund Class A has a Total Expense Ratio of 2.56%. For the period from 01 April 2012 to 31 March 2013, 2.56% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER can not be regarded as an indication of future TER's. Inclusive of the TER of 2.56%, a performance fee of 1.24% of the Net Asset Value of the class of participatory interest in the portfolio was recovered.
