

RECM GLOBAL FUND (Class A)

Period ended 28 February 2014

RECM

The RECM Global Fund is a US dollar denominated global fund that may invest in a wide array of assets without any restrictions. The Fund's aim is to generate returns significantly greater than US inflation and commensurate with equities over the long term. The Fund invests mainly in large global companies at a significant discount to intrinsic value, while using the flexibility of the mandate to protect capital and enhance returns by investing in other mispriced global assets from time to time. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund. The Offering Memorandum is available at www.recm.co.za.

Portfolio Managers	Daniel Malan, Wilhelm Hertzog, Paul Whitburn
Fund Currency	US dollars
Inception Date	31 March 2006
Total Fund Size	US \$527.2 million
Fund Size (Class A)	US \$225.0 million

INVESTMENT COMMENT

During February, we continued with our buying program of Inpex and introduced two new investment ideas, being Norsk Hydro and Semapa. Norsk Hydro is a fully-integrated low-cost global aluminium producer with a best-in-class balance sheet. The business cycle is super-low in this industry right now, with the aluminium price trading at record lows relative to production cost. A semi-permanent competitive advantage for this business is its access to cheaper electricity due to owning its own hydro-electricity generating capacity covering half of its energy requirements. Semapa is a family owned (49%) industrial conglomerate listed in Portugal with an 81% stake in listed company Portucel and 100% of a diversified cement business, Secil. Portucel makes up the bulk of the intrinsic value and is a highly admired paper and packaging business in Europe with a favourable position on the cost curve.

Disclaimer: Collective Investment Schemes in Securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Collective investments are traded at ruling prices. The manager may borrow up to 10% of the net asset value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available from the company/ scheme. Commission and incentives may be paid and if so, would be included in the overall costs. The quantifiable deduction is the annual management fee (and performance fee), whilst non-quantifiable fees included in the net asset value price may comprise brokerage, auditor's fees, bank charges, UST, trustee and custodian fees. Collective investment prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Forward pricing is used. Fund valuations take place at 23h00 Guernsey time on the business day immediately preceding each dealing day. Withdrawal requests and contributions must be received by the Administrators by 15h30 Guernsey time on the business day preceding each dealing day. The Management Company is RECM Global Management Limited. The Custodian is Royal Bank of Canada (Channel Islands) Limited and the Administrators are Kleinwort Benson (Channel Islands) Fund Services Limited. This fact sheet should be read in conjunction with the "Schedule of Similarities and Differences" available on the website. RECM Collective Investments (Pty) Ltd is a member of the Association for Savings and Investment SA (ASISA).
