### About the Fund

The RE:CM Global Fund is a US dollar denominated equity-centric fund domiciled in Guernsey. It invests predominantly in large global companies listed on recognised exchanges across all markets. A prospectus is available from RE:CM Collective Investments (Pty) Ltd.

### Fund Objective

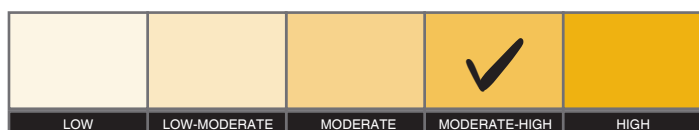

The portfolio aims to outperform the MSCI World Index in USD (including income) over the long term with lower than average risk of capital loss and with less volatility than the index.

### Risk Measures

Whilst the risk is higher than that of a global balanced fund, our investment process is designed to minimise the risk of losing money over the long term.

### INVESTMENT COMMENT

Over the past year, we have spent a lot of time and effort in strengthening our global capability. In fact we have recently set up a working relationship with a Japanese fund management firm, Milestone Asset Management. Milestone was founded by Alexander Kinmont, whom some of you might have met at our "Shifting Perspectives" event last year. He speaks Japanese fluently, and has 5 analysts working with him, exclusively researching Japanese stocks. Although we prefer doing things our self, the Japanese market presents analysts with peculiar difficulties, the most important being the limited information that is available in English. Alex and his team share a very similar investment philosophy and process with RE:CM, and we look forward to working with them. We believe the Japanese market is one of the most undervalued opportunities in global markets at present, and through Milestone we aim to take full advantage. To that effect, we have allocated fund capital to the Ichirizuka Master Fund, just launched by Milestone, which has a mandate to find and invest in Japanese opportunities that are both high quality and cheap at the price.
