## About the Fund

The RE:CM Global Fund is a US dollar denominated equity-centric fund domiciled in Guernsey. It invests predominantly in large global companies listed on recognised exchanges across all markets. A prospectus is available from RE:CM Collective Investments (Pty) Ltd.

## Fund Objective

The portfolio aims to outperform the MSCI World Index in USD (including income) over the long term with lower than average risk of capital loss and with less volatility than the index.

## Risk Measures

Whilst the risk is higher than that of a global balanced fund, our investment process is designed to minimise the risk of losing money over the long term.

## RISK STATISTICS AND PORTFOLIO DETAIL

### FUND PROFILE

### TOP HOLDINGS (%)

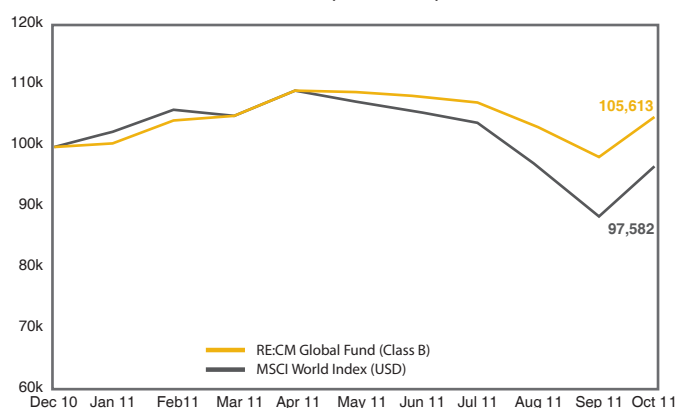

October 2011		October 2010

Since Inception (Class B)	6.5%	-2.5%

- Returns are in USD net of fees with distributions re-invested. Source: RE:CM Analyst, Bloomberg.
- Periods greater than 1 year are annualised.
- Inception Date, 31 March 2006 (Class A), 14 December 2010 (Class B).

\* Class A performance is provided in the table above to unit holders to show historical performance as the B Class has only been operative since December 2010.

### INVESTMENT COMMENT

Over the past month, RE:CM's investment team remained fairly inactive but were net buyers of equity, allocating fund capital to existing ideas Berkshire Hathaway and BP PLC, while selling the small remaining exposure to Oracle.

An initial position in Oracle was established in 2006 below \$20. Fund exposure was increased considerably below \$16 during the course of the market meltdown of 2008/9, when it was priced at a double digit free cash flow yield after all capital expenditures (maintenance and expansion); in short, very cheap for a business of such quality. In early 2011 with the share price well above \$30 and inside our fair value range, we reduced our exposure culminating in the final sale mentioned above. Doubling your money inside of 5 years in a high quality (i.e. low stress) business is a highly respectable investment outcome. Oracle remains a fantastic business that we will keep on our research radar screens, patiently awaiting a round 2 full ownership cycle.

**Disclaimer:** Collective Investment Schemes in Securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Collective investments are traded at ruling prices and can engage in scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available from the company/ scheme. Commission and incentives may be paid and if so, would be included in the overall costs. The quantifiable deduction is the annual management fee (and performance fee), whilst non-quantifiable fees included in the net asset value price may comprise brokerage, auditor's fees, bank charges, UST, trustee and custodian fees. Collective investment prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Forward pricing is used. Fund valuations take place at 11 pm Guernsey time on the first business day of each week. Withdrawal requests and contributions must be received by the Manager by 4 pm Guernsey time on the first business day of the week to be processed that week. The Management Company is RE:CM Guernsey Management Company Limited. The Custodian is Royal Bank of Canada (Channel Islands) Limited and the Administrators are Close Fund Services Limited. This fact sheet should be read in conjunction with the "Schedule of Similarities and Differences" available on the website. RE:CM Collective Investments (Pty) Ltd is a member of the Association for Savings and Investment SA (ASISA).
