

RECM GLOBAL FUND (Class B)

Period ended 31 May 2014

RECM

The RECM Global Fund is a US dollar denominated global fund that may invest in a wide array of assets without any restrictions. The Fund's aim is to generate returns significantly greater than US inflation and commensurate with equities over the long term. The Fund invests mainly in large global companies at a significant discount to intrinsic value, while using the flexibility of the mandate to protect capital and enhance returns by investing in other mispriced global assets from time to time. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund. The Offering Memorandum is available at www.recm.co.za.

INVESTMENT COMMENT

In May we allocated fund capital to existing holdings BP, Alumina, Morrison and Inpex, and raised fund capital from partial sales of existing positions in Orange, Tokyo Gas, OPAP, Amgen and a position we labelled the 'pharma basket' (a grouping of 15 pharmaceutical businesses that cumulatively represented a top 10 fund holding until recently). Most of the businesses on the selling side of our ledger had delivered strong price advancements ahead of their fundamental business value gains over the past year, thereby significantly reducing their respective margins of safety. No fund positions were closed out completely during May.
