

RECM GLOBAL FLEXIBLE FUND (Class C)

Period ended 31 January 2015

RECM

The RECM Global Flexible Fund is a unit trust that may invest in equities, bonds, property, cash and offshore assets without any restrictions. The Fund's aim is to generate returns significantly greater than inflation over the long term while protecting capital against permanent loss through a rigorous adherence to a value-based philosophy. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund.

Portfolio Managers	Daniel Malan, Wilhelm Hertzog, Paul Whitburn
ASISA Sector	Worldwide Multi Asset Flexible
Inception Date (Class C)	1 June 2005
Total Fund Size	R2.0 billion

INVESTMENT COMMENT

When we consider the contents of equity indices in general, and the stocks that one would have had to own in the last few years to have earned high returns, we think that a broad majority suffer from exposure to a single dangerous factor – being a high quality business where the assumed stable cash flows are being discounted into perpetuity using interest rates which are assumed to stay extremely low forever. Needless to say, one is able to justify almost any valuation using such assumptions - and the market is doing exactly that. When something does go wrong with these businesses (not unlikely) or interest rates increase earlier than expected (not unlikely), the end result will be permanent losses of capital. And if you say decision-makers will timeously recognize when interest rates are about to levitate, ask them one question: how many saw the recent collapse in the oil price coming?

Some of the current positions in our portfolios derive their attractive valuations from common fears in the market. We own more than one position in Platinum, Commodities and Gaming for instance. Apart from similarities in terms of their reasons for cheapness, our entire portfolio of stocks has something more important in common – they are all cheap relative to their conservatively calculated intrinsic values. If the fears relating to these companies don't subside - the bad news is already priced in, and losses will be limited. However, we know the far likelier outcome is substantial upside when the fears subside and rationality returns.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RECM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertificated securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. RECM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. A MEMBER OF THE ASSOCIATION FOR SAVINGS & INVESTMENT SA
