

# RECM GLOBAL FLEXIBLE FUND (Class C)

Period ended 31 January 2014

# RECM

The RECM Global Flexible Fund is a unit trust that may invest in equities, bonds, property, cash and offshore assets without any restrictions. The Fund's aim is to generate returns significantly greater than inflation over the long term while protecting capital against permanent loss through a rigorous adherence to a value-based philosophy. We consider risk as the possibility of losing money, not in terms of volatility. Our main risk management tool is our investment philosophy. As value investors, we aim to buy and hold good quality companies and do so with a margin of safety. Our ability to move between asset classes assists in reducing the risk in the fund.

Portfolio Managers	Daniel Malan, Wilhelm Hertzog, Paul Whitburn
ASISA Sector	Worldwide Multi Asset Flexible

## INVESTMENT COMMENT

Notable purchases in the Fund over the past six months include Inpex, Arcelormittal (the global parent company), Mediaset Espana, African Bank and Anglo American. Inpex is a Japanese oil and gas producer that's busy developing the massive Ichtys offshore project in Australia. While the entire oil and gas sector appears to have fallen out of favour with investors, Inpex stands out as the cheapest of the group. As with most oil and gas development projects, there have been upwards revisions to the expected cost of the Ichtys project over time. Given the dim view the market currently has of the capital intensity of global oil companies, it comes as no surprise that Inpex is priced for very poor long-term economics. Based on our work, we're a bit more optimistic about the long-term value on offer. As for sales, a group of European stocks dominate the table. The share prices of Carrefour, Titan Cement and Hellenic Exchanges all reacted strongly to the faintest glimmer of improved business conditions in their European markets.

**Disclaimer:** Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RE:CM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Funds are valued daily at 15h00. Instructions must reach RECM before 14h00 to ensure same day value. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertificated securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RE:CM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. The RECM Global Flexible Fund Class C has a Total Expense Ratio of 5.92%. For the period from 1 January 2012 to 31 December 2013, 5.92% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER can not be regarded as an indication of future TER's. Inclusive of the TER of 5.92%, a performance fee of 3.99% of the Net Asset Value of the class of participatory interest in the portfolio was recovered.
