Regulation 28	Does not comply

About the Fund

The RE:CM Money Market Fund comprises a diversified combination of money market instruments.

Fund Objective

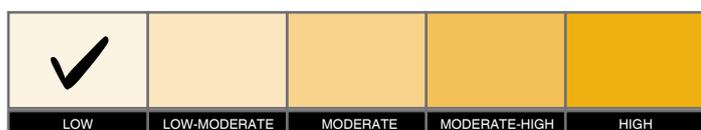

The Fund aims to maximise interest income, preserve capital and provide liquidity. This Fund is also suitable for risk averse investors seeking a temporary, safe holding vehicle in times of market uncertainty. Investors seeking capital preservation, requiring regular interest income and liquidity should invest in this fund.

Risk Measures

Capital losses are unlikely but can occur. For example, should one of the issuers of an asset held within the underlying Fund default and a loss occur, this loss will be borne by the Fund and the investors

RISK STATISTICS AND PORTFOLIO DETAIL

FUND PROFILE

- This fund has a low risk profile

CREDIT EXPOSURE (%)

July 2011

PERFORMANCE AND COMMENTARY

PERFORMANCE

This Fund was launched on the 1st October 2010. As such, it does not yet have a full performance history to report. Over time this document will include the monthly performance of the Fund versus its benchmark, as well as the cumulative performance of the Fund versus its benchmark, the SteFI Call Rate.

* The yield is calculated using an annualised 7 day rolling average as at 31 July 2011 (gross of fees)

INVESTMENT COMMENT

The July inflation reading jumped to 5.0% compared to June's reading of 4.6%. Inflation has been rising every month since its lows last year. Headline inflation is expected to be under further pressure due to the recent high wage settlements of 8% and higher. Higher wages push business costs up resulting in higher consumer prices. Despite the low interest rate environment, the local economy is struggling to create jobs and boost growth. Global economies are experiencing similar disappointing economic growth patterns. As a result, the Reserve Bank is expected to keep interest rates unchanged until the economy shows signs of improvement. The sovereign debt crisis in Greece seems to have been temporarily resolved following the extension of another European bailout plan. However, Spain and Italy are touted to be experiencing deep economic problems of their own, putting a strain on global economic recovery. Although the US debt ceiling has been raised, it doesn't appear to be enough to boost the economy. Furthermore global companies like HSBC have been announcing significant job cuts in order to preserve profitability.

The fund continues to be conservatively invested in money market instruments and counterparties that generate yields better than the market. We invested in longer-dated instruments before deposit rates declined, and as a result, the fund benefited from our recent policy decision to extend the duration above 60 days. The fund is also sufficiently invested to benefit from the potential upside in rising interest rates over the next twelve to eighteen months. The deposit instruments in the fund remain invested with local top-rated banks. The fund generated a yield of 5.6% in July versus the benchmark of 5.4%.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RE:CM Collective Investments (Pty) Ltd (RE:CM). Commission and incentives may be paid and if so, would be included in the overall costs. The price of each unit in the RE:CM Money Market Fund is aimed at a constant value. The total return to the investor is primarily made up of interest received but, may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in an extreme case it can have the effect of reducing the capital value of the Fund. Forward pricing is used. Funds are valued daily at 15h00. Instructions must reach RE:CM before 14h00 to ensure same day value (11h00 for the RE:CM Money Market Fund). Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertified securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RE:CM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000.
