Income Declarations	Monthly distributions are paid in cents per unit
Regulation 28	Does not comply

About the Fund

The RE:CM Money Market Fund comprises a diversified combination of money market instruments.

Fund Objective

The Fund aims to maximise interest income, preserve capital and provide liquidity. This Fund is also suitable for risk averse investors seeking a temporary, safe holding vehicle in times of market uncertainty. Investors seeking capital preservation, requiring regular interest income and liquidity should invest in this fund.

Risk Measures

Capital losses are unlikely but can occur. For example, should one of the issuers of an asset held within the underlying Fund default and a loss occur, this loss will be borne by the Fund and the investors.

INVESTMENT COMMENT

The RE:CM Money Market Fund generated an income yield of 5.6% against the benchmark yield of 4.9%. The portfolio duration increased from 53 days in April 2013 to 80 days at the end of May 2013. The money market yield curve steepened off the back of higher government bond yields over the month and fund duration was increased to benefit from the increased rates on longer maturity instruments. The South African Reserve Bank (SARB) kept the repo rate at 5% following the MPC meeting in May. April headline inflation was also unchanged from March at 5.4% (below the market consensus of 5.7%). Domestic economic growth disappointed at 0.9% for the first quarter of the year and was the lowest since the recession in 2009. SARB revised its annual growth forecast from 2.7% to 2.4% for 2013 while the growth outlook on the global front also remains weak. Wage negotiations and electricity outages are expected to place additional pressure on production over the next few months and export demand especially from Europe remains subdued. The depreciation of the Rand to 4-year lows should boost exports but the current negative sentiment towards the country would make it difficult for SARB to cut rates in the short term. The Fund remains competitively positioned in the current interest rate cycle. We have increased our holdings of longer dated fixed maturity bank paper as volatility in the currency and bond markets provided a window of opportunity to acquire these instruments at attractive yields. Floating rate instruments make up 65% of the portfolio which includes exposure to higher rated corporate bonds at 10%.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RE:CM Collective Investments (Pty) Ltd (RE:CM). Commission and incentives may be paid and if so, would be included in the overall costs. The price of each unit in the RE:CM Money Market Fund is aimed at a constant value. The total return to the investor is primarily made up of interest received but, may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in an extreme case it can have the effect of reducing the capital value of the Fund. Forward pricing is used. Funds are valued daily at 15h00 with the exception of the RE:CM Money Market Fund which is valued before 18h00. Instructions must reach RE:CM before 14h00 to ensure same day value (11h00 for the RE:CM Money Market Fund). Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertified securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RE:CM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. *Acting under supervision from Piet Viljoen.
