

RECM MONEY MARKET FUND (Class A)

Period ended 31 May 2014

RECM

The RECM Money Market Fund is a money market unit trust that provides a sensible cash portfolio with very competitive fees. The Fund aims to maximise interest income, preserve capital and provide liquidity. Capital losses are unlikely but can occur. For example, should one of the issuers of an asset held within the underlying Fund default and a loss occur, this loss will be borne by the Fund and the investors.

Since Inception	5.6%	5.1%

INVESTMENT COMMENT

The RECM Money Market Fund generated an income yield of 6.2% against the benchmark yield of 5.1% as at 31 May 2014. Portfolio duration was relatively unchanged at 75 days. Headline inflation breached the Reserve Bank's target range in April coming in at 6.1% from 6% in March. This was mainly driven by higher food and beverage costs. Producer level inflation also increased ahead of expectations. The Reserve Bank kept the repo rate unchanged at 5.5% following the MPC meeting citing the upside risks to inflation arising from currency volatility as a cause for concern. We continue to positively position the portfolio for any potential increase in interest rates by increasing exposure to floating rate instruments. There is currently about a 50% weighting between fixed and floating instruments. The economic growth forecast was revised down to 2.1% with fundamentals remaining under pressure and strikes in the mining sector continuing to constrain growth. Currently we have no exposure to corporate bonds but we continue to look in both primary and secondary markets for attractive value.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RECM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. The price of each unit in the RECM Money Market Fund is aimed at a constant value. The total return to the investor is primarily made up of interest received but, may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in an extreme case it can have the effect of reducing the capital value of the Fund. Forward pricing is used. Funds are valued daily at 15h00 with the exception of the RECM Money Market Fund which is valued before 18h00. Instructions must reach RECM before 14h00 to ensure same day value (11h00 for the RECM Money Market Fund). Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Different classes of units apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit portfolio including any income accruals and less any permissible deductions (brokerage, uncertified securities tax, VAT, auditors' fees, bank charges, custodian fees, trustee fees, annual management fee and performance fees) from the portfolio divided by the number of units in issue. These portfolios may be closed. RECM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. *Acting under the supervision of Piet Viljoen.
