

RECM MONEY MARKET FUND (Class A)

Period ended 30 September 2014

RECM

The RECM Money Market Fund is a money market unit trust that provides a sensible cash portfolio with very competitive fees. The Fund aims to maximise interest income, preserve capital and provide liquidity. Capital losses are unlikely but can occur. For example, should one of the issuers of an asset held within the underlying Fund default and a loss occur, this loss will be borne by the Fund and the investors.

INVESTMENT COMMENT

The RECM Money Market Fund is positioned to deliver an effective yield of 6.5% over the next 12 months. For the month of September the fund returned 0.52% versus the STeFI Call Rate return of 0.44%. Fund duration reduced from 88.4 to 82.8 days during the month. We have maintained duration within the 60-90 day range to take advantage of the pick-up in yields of longer dated instruments. The SARB kept the repo rate unchanged at 5.75% following the MPC meeting citing weak economic growth remaining a cause for concern. The economic growth forecast was revised down to 1.5%. Domestic headline inflation increased slightly to 6.4%, whilst producer level inflation decreased to 7.2% from 8.0% in August. The portfolio is competitively positioned with an approximately equal weighting between fixed and floating rate instruments. Currently we have no exposure to corporate instruments but we continue to look in both primary and secondary markets for attractive value.

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The manager may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists. A schedule of fees and charges and maximum commissions is available on request from the management company, RECM Collective Investments (Pty) Ltd (RECM). Commission and incentives may be paid and if so, would be included in the overall costs. The price of each unit in the RECM Money Market Fund is aimed at a constant value. The total return to the investor is primarily made up of interest received but, may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in an extreme case it can have the effect of reducing the capital value of the Fund. Forward pricing is used. The RECM Money Market Fund is valued daily before 18h00. Instructions must reach RECM before 11h00 to ensure same day value. Different classes of units apply to these portfolios and are subject to different fees and charges. Fluctuations or movements in exchange rates may cause the value of underlying international instruments to go up or down. These portfolios may be closed. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period TER's do not include information gathered over a full year. RECM Collective Investments (Pty) Ltd, Company Registration Number: 2004/027540/07, is a member of the Association for Savings and Investment SA (ASISA). Trustees: The Standard Bank of SA Limited, PO Box 54, Cape Town, 8000. ***Acting under the supervision of Piet Viljoen.
